Phlebotomy with EKG Hands On Workshop

One day hands-on basic phlebotomy National certification with basic EKG training workshop.

- Proven to provide you with the proper and necessary skills used in the field of phlebotomy and basic EKG.
- Designed not to require a lot of your time and money.
- Covers all important skills and techniques used in phlebotomy and basic EKG.
- For the serious individual who wants to learn the latest safety techniques and enhance their skills from previous training.

Prerequisites

The Medical2 Phlebotomy Workshop is open to those who are at least 18 years of age, high school diploma or GED, and medical background.

Our seminar does not consist of book work or written exams. Medical2 Inc. "exams" are practical skill examinations. Before these practical's, all participants will be taught the proper handling and concept of the procedure in which to be performed. You then proceed to the practice area and finally will prove competency on our specially designed manikins and live draws. The manikins were designed to simulate the human antecubital region (the primary area for venipuncture) as accurately as possible, all the while providing a simulated "blood return", for better understanding and reinforcement of the procedure for the participant. Upon successful completion of the workshop, the participant will receive manuals by email and a national certification by mail. The certificate will be available on the following Monday after the seminar.

- Medical/Healthcare-related courses that you may have taken or are currently taking. You need not have fully completed these courses nor earned a degree/certificate/or license, in order to be eligible to attend our workshop.
- Actual field work, on the job training, internships/externships, home health care, etc.
- Volunteering in a medical/healthcare setting.

Notice- Medical2 does not provide nor guarantee jobs. We provide CE Hours and skill enhancement services only. Continuing Ed Providers "Provider approved by the California board of Registered Nursing" License Number:15509.*Restrictions are found in California and Louisiana, dependent solely upon your employer, as these two states have created state-specific licenses that may be required of you in order to perform Phlebotomy. Please check with your employer as to whether these restrictions may apply to you before registering.
